

# Apple Door Greeter

Hoop stabilizer, I used my 2oz. Cut away.

Run the first set of stitches to indicate where to place top fabric.

Run the second set of stitches to hold down the fabric.

Then allow the center design to stitch. Once the letter is finished stitching, stop your machine and place your back fabric on. Return to machine and run the hold down stitches.

Remove from machine and trim the front and back fabric. Return to the machine and stitch out satin or finishing stitches.

Repeat with the letters to complete your welcome.

Trim the stabilizer away. Run your Ribbon through the top hole (stem) and down the back and out the bottom hole. I used hot glue to make the apples stay where I wanted them to on the ribbon then hang on your door or wall.
