

# Egg Basket Instructions

## Egg Panel:

Hoop the stabilizer. I used heavy weight cut away  
Run your placement stitches. Lay down a piece of fabric  
on the bottom section crossing the top of the center placement  
line and then lay down a piece of fabric on the top over lapping  
the bottom. Run the tack down stitches then trim the excess  
fabric run the center fancy stitches. Now lay down a piece of  
fabric on the back of the stabilizer. Run the tack down stitches  
then trim the excess fabric Run the rest of the design to the end.

## Side Panel and Handle:

Hoop the stabilizer. I used a heavy weight cut away.  
Run the placement stitches. Lay down a piece of fabric  
on the front and back. Run the tack down stitches then  
trim excess fabric. Run to the end of the design.  
you need 2 side panels and 2 handle panels.

## To assemble:

Stitch the side panels together as shown.  
Then stitch the side panels to the egg panel  
I did this by hand using a whip stitch. Starting  
about 1/4 inch from the fancy stitch on the  
egg panel and working around the bottom of the  
egg panel to the opposite side. Repeat on the opposite  
side. Stitch the handle as shown then open the  
holes and run ribbon through and attach to the  
side basket panel and on top of the handle.
