

Use 6 squares and then the 3 top squares for the front and the back.

For the side use 3 squares for each side.

Bottom is 3 blank squares.

To do the applique.

I hoop 1 layer of badgemaster.

I run the first set of straight stitches to show where to lay down my first fabric square.

I also use 1 layer of 2.5 to 3 oz cutaway stabilizer.

Lay down your stabilizer and fabric and run the design stop when the design is finished and trim the top fabric and stabilizer. Lay down your back fabric and run the tack down stitches stop your machine and trim the fabric before it does the finale satin stitch.
