

Halloween Bowl 07

Hoop your stabilizer (water soluble)
Run your first set of straight stitches
this will indicate where to place your fabric
remove hoop from machine, keep hooped
and tape down your fabric scrapes where
indicated front and back. You can add a cut away
to help keep the bowl ridged.
Return to hoop and run the rest of the
hold down stitches. Remove hoop from
machine and trim fabric. Return to machine
and finish stitching the panel.
You will need 5 for this bowl.
Repeat with the bottom of the bowl

Attach the bottom of the side panels to the bottom of
the bowl. Then work from the bottom to top and sew
the side panels together.
Rinse out you stabilizer leaving in just enough to keep the bowl ridged.
I find a house hold item to drape the bowl over and
help to form while drying.
