

Lemonade Coaster set

Hoop your stabilizer
I use a 2.5 oz cut a way
stitch out the lay down
stitches then lay down your
front fabric. Stitch the center
design once it is down
lay the back fabric down on the
back of the hoop and stitch the
tack down fabric. Remove from machine
and trim the fabric return to the machine
and run the finale satin stitches.
Trim the stabilizer as close as you can.

For the rest of the pieces hoop your
stabilizer and run the placement stitches
then lay down your front and back fabrics
run the tack down stitches then trim the
fabric front and back return to the machine
and run the finale satin stitches.

To assmemble stitch the 2 blue pieces together
then stitch the small triangles as shown to the
main square. Starting at the bottom of the square
stitch the bottom blue piece to the main square.
Work your way up to the triangle and ease the blue
square to the triangle I stitched this by hand.
Do the same with your back pieces. This forms your
spout.
Stitch your side pieces to the main square
Once you have this add your handle to the oposite
side or you pour spout.
