

Snow Crystal Sleigh

Stitch out all the pattern pieces

Then assemble the center pieces as shown.

Next assemble the sides. Over lap the front on the back and either hot glue or stitch together. I used a needle and thread.

Next fit the center piece to one side and use a whip stitch to attach them together working your way around. I matched where the sides were straight and allowed the areas that are pointed to over lap. Do the same with the second side. When done with this attach the runners as shown on drawing.
