

Sweeper Cover

Hoop your stabilizer, I used 2.5 oz cut away.

Fabric panels:

Run the placement stitches then lay down your fabric. I use fabric on the front side only. Run the tack down stitches, trim excess fabric and finish the design. you need 6 of these

Terry Cloth panels:

I used scraps from the bath puppets.

Hoop your stabilizer and run the placement stitches. Lay down your scraps to form a square leaving some over the placement stitching.

Run the tack down stitches and center design.

Now trim excess terry cloth. Run the rest of the design.

Stitch the 9 panels as shown.

Wrap the fabric sides on your sweeper and tuck in the provided holes.
